OBJECTIVE

I'm Pavel Hasan Joy, a Computer Science & Engineering undergraduate with a clear goal — to become a skilled Full-Stack Software Engineer with a strong focus on frontend & backend development and an AI Engineer.

SUMMARY

Accomplished Computer Science undergraduate at ULAB with an extensive background in software development, specializing in Full-Stack Architecture and Machine Learning applications. Successfully engineered complex software solutions, from geospatial satellite analytics to browser-based biometric AI systems. Adept at C, C++, Java, Git, and GitHub with a strong focus on delivering clean, maintainable, and high-impact code.

EDUCATION

B.Sc. in Computer Science & Engineering (CSE) University of Liberal Arts Bangladesh (ULAB) - Dhaka, Bangladesh	2023 – Present
HSC in Science Naogaon Govt. College - Naogaon, Rajshahi, Bangladesh CGPA: 4.50	2023 – 2024
SSC in Science Tapir Bari Ansar High School - Gazipur, Dhaka, Bangladesh CGPA: 5.00	2021 – 2022

SKILLS

Computer Skills:	C programming Language, C++, Java, Git and GitHub
Languages:	Bangla (Native), English (Professional), Hindi
Professional Skills:	Problem Solving, Object-Oriented Programming (OOP), Data Structures & Algorithms
Soft Skills:	Teamwork & Collaboration, Effective Communication, Time Management & Prioritization, Adaptability & Fast learner

CERTIFICATIONS

Introduction to AI and Machine Learning on Google Cloud NetCom Learning

ACHIEVEMENTS & HACKATHONS

- Hackathon - ULAB Computer Programming Club (15-08-2026)**
Secured 4th position. Built Campus Safety — a real-time web platform engineered to assist students and emergency responders during campus emergencies.
- NASA Space Apps Challenge (2026)**
Global Hackathon Participant. Engineered Climate Lens — Bangladesh, a 3D spatio-temporal geospatial observatory visualizing climate volatility from NASA satellite observations and CMIP6 climate models.
